

Press Release: Mobile User Experience at Nirvana

March 9, 2011

Nirvana Solutions announces that Nirvana clients now have access to real-time P&L and reporting through their preferred mobile technology platforms. "Our Android, iPad and iPhone clients are on the cutting edge of technology and we're right there with them. We're in the first inning of a major platform shift that has the potential for massive adoption," said Shams Karim, CEO at Nirvana Solutions.

Mobile technology is altering the way hedge funds, fund administrators and prime brokers think about delivering real time, accurate information. "Now is the time to leverage meaningful and relevant information whenever and where ever you are. Transparency through innovation drives down costs and provides competitive advantage for our clients. We're please to be one of the first, if not the first portfolio management system vendor to deliver real time P&L to the alternative investment community for Android, iPad and iPhone," said Steve Lewczyk, Co-founder at Nirvana Solutions.

Many funds are taking advantage of Nirvana's free test drive of its real-time P&L for Android, iPad or iPhone. If interested, please contact our sales team at (212) 768-3410 to learn if you qualify.

About Nirvana Solutions (www.nirvanasolutions.com):

Founded in 2006, Nirvana Solutions is a New York based software company that provides real-time portfolio management systems to multi-prime hedge funds, prime brokers, and fund administrators. Nirvana(TM) is the hedge fund industry's first portfolio management system built around the Financial Information Exchange (FIX) protocol. The ability to dynamically accept FIX messages, combined with the aggregation of multi-prime data, ensures true real-time views of critical measures such as P&L and Risk. Nirvana's ability to offer real-time transparency is complemented by a full suite of on-demand and historical reporting. The Nirvana solution is made available in an easy-to-deploy Software as a Service (SaaS) model and can be implemented in a modular or complete fashion.
